

Penclit Mouse B2™

Penclit Mouse™ places superior navigation at your fingertips. Our ergonomic computer mouse will make hours of working and surfing more efficient. The pen-grip provides a relaxed working position to help secure your strength. It provides amazing user experience and you will work smarter with increased productivity. Penclit Mouse™ is the latest Scandinavian designed computer mouse which prevents and eases your pain.

Perfect precision and speed is now at hand!

Penclit Mouse™ looks, feels and moves like a pen. It offers you simplicity and the ability to utilise and benefit from the fantastic natural control we have in our fingertips and hands. The mouse provides an amazing user experience. It feels like the mouse itself predicts where you are planning to move the cursor. This high precision allows for movements and abilities unlike any other computer mouse on the market.

The perfect position

Penclit Mouse™ creates a relaxed working posture to secure your strength. It allows your forearm to rest on the work surface. You can move the mouse cursor all over the computer screen quickly and effectively. Penclit Mouse™ counteracts static tensions in your arms, shoulders and neck.
